

Date: 10/25

## Wednesday Challenge Form

Group Members: Zachary and Nicolas

Problem Statement: we had to make a 90  
Degree angle out of straws

Approach: we had decided to wing it and do  
What we felt looked right. We held it together  
with duct tape and hoped it would work

Solution: I thought we had made a group but Was wrong so  
we weren't able to participate although we would have won

Lessons Learned: don't eyeball it and make  
Sure you have a group
