

Date: 2/22

## Wednesday Challenge Form

Group Members: Zachary, Paul

Problem Statement: We had to build an A in Sketch up and then wait to get one from Another group

Approach: we chose to just sketch out the A that we had gotten from another team and hope For the best

Solution: Everyone got at least 9 but the winning Team was just a little more than the rest

Lessons Learned: We learned that careful planning is good but sometimes just doing it is better
