

Date: 2/8

Wednesday Challenge Form

Group Members: Zachary, Nicolas, Alex

Problem Statement: The place where the robotics Competition is held has a rule against all flying Objects so we need another trinket

Approach: Nicolas came up with an idea for a Trinket and it was pretty good. The idea for the Trinket was a small box with six small plastic Balls in it that could move freely and one side Of the box would have a clear cover so that the Balls could be seen

Solution: I was absent the day that the winner Was chosen so I don't know who it was

Lessons Learned: flying objects don't always Make good toys
